## ► RGB + IC Display

### The world is made of numbers.

The **single-digit LED display** with **7 segments** offers plenty of flexibility in display while maintaining a long service life and low energy consumption.

Our SMD RGB Displays can be realized even with a tiny digit height of **10 mm** without compromising on luminosity and variety of colors.

The SMD LED solution is ideal for **white goods** and all kinds of **display units** – from the entertainment industry and manufacturing plants right up to the medical sector.
